

## CheckPlusFinancial

### Secure Banking Solution to Streamline the Issuance and Management of Official Checks and International Drafts

- Laser Printed Official Checks, Counter Checks and International Drafts
- Laser Printed New Account Starter Checks Personalized and Encoded

CheckPlusFinancial delivers an advanced solution to automate Home Office, Branch, Back-Office, and Remote-Client Official Checks, Counter Checks, International Drafts and New Account Starter Checks in a secure environment using state-of-the-art laser printed checks.

CheckPlusFinancial can interface with your existing core banking system allowing for integrated management of your check requests, approvals, and laser printing providing fraud protection, efficiency and cost savings to all your branch locations and back-office operations.

Eliminates the cost and risk associated with pre-printed check stock. If your branches use dot-matrix printers or other outdated equipment, your operational costs for purchasing, handling, and storing check stock are more expensive than they need to be. Cost savings of up to 82% can be achieved with MICR laser printers and blank check stock.

Your financial institution will gain operating efficiencies and improve control processes while eliminating hard dollar costs associated with pre-printed checks. In moving to “blank” check stock, your bank can leverage their teller/customer service platform investments to print the entire negotiable instrument in a single pass through the printer.

#### This affords the financial institution the opportunity to:

- Reduce the issuance time by 50% or more, improving the customer experience
- Eliminate required control processes for pre-printed items
- Dispense with check stock waste
- Provide enhanced security for bank check printing
- Deploy quickly and easily
- Experience a fast ROI

#### New Account Kits – Personalized and Encoded

Today, new account kits issued to new customers provide limited value and increase annual costs associated with operational controls, inventory management, emergency shipping, storage, spoilage, and customer frustration. Leading financial institutions are now printing their new account starter checks with their customer's names and account number on them thus enhancing account activation.

#### New Account Kits Benefits:

- Improve customer satisfaction – personalized checks are more readily accepted by merchants
- Alleviate the threat of fraud – negotiable items in each branch no longer need to be securely stored, managed, or re-ordered when data requires updating
- Eliminate shipping charges – no more “emergency” shipments when a branch runs out of pre-printed new account kits

## Overall Benefits of CheckPlusFinancial

- Increased customer satisfaction
- Decrease transaction time
- Enhanced Official Check printing security
- Scalable for large business requirements
- Increases productivity and MICR document security
- Secure program access and processing functions
- Customizable to your business needs
- Write checks quickly and securely
- Reprint lost or damaged checks
- Seamless and streamlined check production
- Reduction of operational costs
- Produce fully personalized & encoded starter checks

## Features

- Seamless integration with your core banking system
- Supports back-office functions
- Unlimited users and checking accounts
- Advanced encryption all the way to the printer
- Encryption of program data
- Comprehensive multi-level password security
- Digitally encrypted logos and signatures
- Ability to handle local and distributed processing
- History database of printed checks allows reprocessing under controlled conditions
- Centralized control and audit function
- On-demand, Automatic and Manual check modules available
- Supports multiple banks, accounts, currencies and check layouts
- Signature controls by amount and other parameters
- Time-out security and password expiration controls
- Multi-level security controls
- Comprehensive user activity monitoring and Audit Log

## System Requirements

- **Supported Operating Systems:** Windows Server 2003 Service Pack 2; Windows Server 2008; Windows Vista; Windows Vista Service Pack 1; Windows XP Service Pack 2; Windows XP Service Pack 3
- **32-Bit Systems:** Computer with Intel or compatible 1GHz or faster processor (2 GHz or faster is recommended. Only a single processor is supported)
- **64-Bit Systems:** 1.4 GHz or higher processor (2 GHz or faster is recommended. Only a single processor is supported)
- Minimum of 2 GB of RAM is recommended
- 1 GB of free hard disk space

CheckPlusFinancial is a Windows Application provided with a Microsoft SQL Server 2008 Express - Advanced Edition Database. Microsoft SQL Server 2008 Express – Advanced Edition is a powerful and reliable data management system that delivers a rich set of features, data protection, and performance for embedded application clients, light Web applications, and local data stores. Designed for easy deployment to integrate seamlessly with your other server infrastructure investments.

However, if you already have installed Microsoft SQL Server 2005 or later, you can restore the CheckPlusFinancial database to it.

### **Printech Guarantee**

MICR readability and performance are guaranteed as long as the MICR laser printer and associated supplies are purchased from Printech or an Authorized Printech representative.
