

Document Processing Solution

Successful Mailings Equal A Successful Business

Mailings, including checks, invoices and marketing pieces, are a critical part of all businesses and must be delivered with a professional look and in a timely manner. Paper processing equipment automates this task, providing the look you need and completing mailings in no time. Printech offers a top-of-the-line Pressure Seal solution to meet your paper processing needs.

Automated Mailing Solutions That Save Time and Money

Our core solution is the AutoSeal Pressure Sensitive One-Piece Mailing Equipment – No envelopes required.

AutoSeal – Decreases Processing Time and Eliminates Envelopes

When one piece of paper is all you need, the AutoSeal solution is ideal for processing any document that can be printed on one sheet of paper.

The process involves two steps to prepare your document for the mail:

1. Forms with pressure sensitive glue are printed in your laser printer
2. The printed forms are then placed in the AutoSeal machine to be folded and sealed creating a one piece mailer.

What is a Pressure Seal One-Piece Mailer?

A pressure seal one-piece mailer is one sheet of paper with pressure sensitive glue and perforations along the edges. The document folds onto itself creating an outgoing piece of mail without using an envelope. To open the document simple tear off the perforated edges.

Why Pressure Seal?

Simply put, pressure seal is a fast, reliable and secure way to process documents. By automating your paper folding, labor time is cut by 95%. Automation cuts both cost and labor time.

- Processing time is decreased, increasing productivity
- No more envelopes to order or store
- No messy glue, water, heat or envelopes needed
- Postal service friendly: meets postal guidelines and specifications
- Superior print quality over continuous impact one-piece mailers

AutoSeal Options

From payroll and invoicing in a small office environment to processing documents in a full-fledged mail house, the AutoSeal folder/sealer line is available in tabletop and industrial size units to accommodate just about any size business. Processing your forms using a tabletop AutoSeal allows you to process documents in a third of the time it takes to process forms using a comparable tabletop inserter. Tabletop AutoSeal units can process forms at speeds of up to 11,000 forms per hour whereas a similar size inserter processes forms at a rate of up to 3,300 forms per hour. AutoSeal saves valuable time and eliminates the extra storage and expense of envelopes.

AutoSeal Applications

Checks, Invoices, Two way mailers (outgoing document with a built in return envelope), Utility Bills, Grade Reports, Student Schedules, Pin Numbers, Marketing Pieces, Tax Forms and many more.

For more information or pricing regarding the AutoSeal Folder/Sealer and PressureSeal forms, please email info@printech.com or call us at (866) 592-2838 in the U.S. or 1-305-592-2838 for international calls.
