

OM Stats-Print Tracking and Auditing

Are Rising Printing Supplies Costs an Issue?

The Problem – Print supplies cost continues to increase. There is not enough data to determine the cause. Without understanding why costs are increasing the appropriate actions to contain or reduce cost cannot be identified. The solution, OM Stats!

The Solution: OM Stats – OM Plus is an advanced spooling system that is used by over 6,000 customers in 35 countries. Because OM Plus is a spooling system, OM Plus captures a great deal of data about the printing operation.

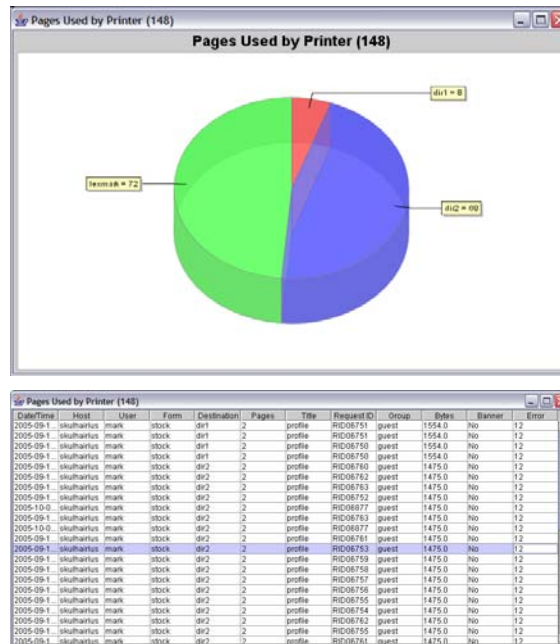

OM Stats is an optional module for OM Plus that allows users to access the wide range of data within the OM Plus system. OM Stats allows users to define the data fields to export from OM Plus' internal log to any odbc, jdbc compliant database. OM Stats also comes with a number of standard template reports to help customer analyze print volumes and costs by user, device or group/department.

Report Templates

OM Stats provides a number of standard reports that can be used to pinpoint print costs. In addition, the detailed data is kept in standard odbc or jdbc database and users can easily create their own custom reports by using a variety of standard tools.

Sample OM Stats Reports

- Jobs, pages, sheets per printer
- Jobs, pages, sheets per user
- Jobs, pages, sheets per printer by user
- Jobs, pages, sheets per printer by group
- Jobs, pages, sheets by doc type/user/printer (ie MS, http, other)
- Estimated cost per device, user, group based on device type (eg. Mono printer, multi function, color device, fax server, email server)

““I want to thank (you) for your dedicated support to OSF. We are controlling output in multiple ways and I do not think things could have gone better. I just wanted to let you know I appreciate all your help!”

OSF HEALTHCARE

“We are very fortunate to have OM Plus in our environment. The payback for the purchase has been tremendous”

LIBERTY MEDICAL SUPPLIES, Port St. Lucie

Also from Plus Technologies:

- RM Plus – for secure web access to your document repository
- Supports reports from multiple sources including business applications and scanners/MFD's
- Intuitive file folder taxonomy
- Client and browser access
- Imbedded email
- Electronic sticky notes, data export to excel, extensive search capabilities
